# 公司简介

COMPANY INTRODUCTION

DOWELL Printing Press was developed and founded in Year 2000, from that moment till to now are keeping to develop, improve and upgrade the Flexo, Gravure, Rotary screen and converting of the multi-configuration printing machine , and as a leading manufacturer in the narrow web market. Our excellent engineering continues to develop new solutions and quality of our presses and services are second to none.

Year 2005 co-operation with the Swiss Engineering company and this partnership has strengthened Dowell's technology up to international level and offering the Dowell L series combination platform line equipped with Flexo, Gravure, Rotary screen, Hot / Cold foil and converting, including Inkjet, this enables converters to complete in the wide range label and packaging market. Year 2015 with 15 years of Dowell technology and experience Dowell designed the MF Series with short web path and twin servo Flexo for the cost effective

Year 2018 DOWELL will moulds the brand image with strict quality management system and high quality marketing team and complete after sale service. Finally effective Dowell combination press is truly the ultimate in efficiency.
